SPACE IS CALLING!

Have you ever stared up at the night sky and wondered what's out there? Well, the universe is buzzing with action! From moon landings to Mars missions, space science is exploding with new discoveries.

India's Gaganyaan mission, aiming to send humans into space for the first time, is nearly launch-ready. Plans for Shukrayaan, a mission to explore Venus, and a made-in-India space station are already on the table.

NASA's Artemis is preparing to send humans back to the Moon, and the James Webb Telescope is capturing stunning images of distant galaxies. Even private companies like SpaceX are launching rockets and dreaming of sending people to Mars.

This issue of *Tell Me Why* takes you inside the latest missions, and technologies shaping our future in space.
