## **TECHNOLOGY THAT SHAPES OUR FUTURE**

Imagine a plant that glows in the dark- thanks to jellyfish genes! This isn't science fiction; it's real science. And it's just one of the mind-blowing wonders that biotechnology is making possible today. Biotechnology uses living things like cells and DNA to solve real problems in health, farming, and the environment.

From life-saving medicines to lab grown food, and from eco-friendly fuels to natural fibres stronger than silk, the possibilities of biotechnology are endless. These breakthroughs aren't in the future -they're happening right now!

This issue of *Tell Me Why* invites you to explore the fascinating world of biotechnology and discover how it's shaping our future.
