## THE GLORIOUS PRIZE

One fine morning, Alfred Nobel, the inventor of dynamite, opened a newspaper and was stunned to read his own obituary. The paper had mistaken his brother's death for his own - and called him the 'the merchant of death'. The words hit Nobel like a thunderbolt. He was still alive but now forced to see how the world might remember him. He decided that his fortune should no longer stand for destruction but for discovery.

That moment of reflection gave birth to the Nobel Prize, one of the world's most prestigious honours. Every year, it celebrates extraordinary people in physics, chemistry, medicine, literature, peace, and economics.

This issue of *Tell Me Why* celebrates the geniuses whose brilliance changed the world.
